

**Source:** [KBhBIO101SelfOrganization](#)

Here it is:

Definition 1 · **Core Rule of Biology** Things that are attracted, come together

Think!

- DNAs! (A-G/T-C)
- Cell receptors!
- Drugs!
- Reproduction!

Very often, these are resulted from chemical charges. **Simple charge differences may result massive effects** — a charge difference in one molecule could start an opioid crisis.
