

- Paper “trying to be inconclusive” because they don’t want to be wrong
- Not very conclusive
  - Venus less studied
  - Recommended space YouTube videos from brother
  - Then, YouTube’s algo recommended the paper to him
- “Grandmother was *NOT!* abducted by aliens” => but! interest in Fermi’s paradox
  - Fermi’s paradox videos got sent from brother

Suggestion: lead in with Fermi’s paradox?

Flow of presentation

- Talk about fermi’s paradox
- Talk about the fact that people have not been looking at Venus
- But there is phosphine!
- Talk about where phosphine is
- There are phosphine
- Issues of measurement must be correct
- Perhaps a way of sparking further Venian exploration and/or research into photochemical pathways for the creation of pho
