1 | Organelles in Eukaryotic Cells

1.1 | Chloroplast and Mitochondria

- **Chloroplast** — found in plants + does photosynthesis
- **Mitochondria** — found in animals + store ATP and extract energy from ATP

1.2 | Rough Endoplasmic Reticulum (ER) and Smooth ER

- **Rough ER** — covered by ribosomes and folds [\[KBhBIO101Proteins\]](#) proteins
- **Smooth ER** — not covered by ribosomes and makes [\[KBhBIO101Lipids\]](#) lipids

1.3 | cell wall and plasma membrane

- **Cell Wall** — found in plants => surround the cell: hard
- **Plasma membrane** — found in animals => surround the cell: soft [\[KBhBIO101Lipids\]](#)
