Very simple structures, or “automations”, to life causes complicated effects and massive systems.
For instance, here’s a...

Flying Vee

1. Bird, if you see another bird < 6ft, follow it
2. Bird, if who you follow veers > 30°, stop following it
3. Bird, if you follow a bird, follow on the side
4. Bird, make sure you are > 10ft from any other bird you are following

And, you get a flying Vee shape (if you click that option)!

**The information to construct a flying Vee exists bottom-up, in EVERY UNIT of the Vee*

Units that comprise life
