

1 | The Little Ice Age

Global climate changes **between the 1550s-1750s** causes increased temperatures in the Northern Hemisphere. Historians call this “The Little Ice Age”

Theories of Causes

See [\[KBhHIST201TheoriesOfLittleIceAge\]](#)

Resulting Effects

DISEASE, DISEASE, DISEASE

In 'Murica

Malaria was rampant, meaning quite a few different things were going South. Literally.

- People who do have jobs kept dying
- People in Europe don't really want to, ye know, show up
- So Slave market sprung

In China
