### Electric — Alina Baraz

- Interesting EQ choice on vocals
- Synth panning automation?
- Vocal filtering action
- Drum machine being filtered too
- A LOT of filtering on vocals during chorus + backing vocals being synthesized instead of sung?
- Male chorus seems to be eqed for bases w/ a pretty low HP
- Filter and gain automation on synth create “wobbly” effect
- Ending rain SFX + a mids-only sonud effect
- More wobbly filtering synth

### Film — Aphox Twin

- Already, lot's of drum machine action
- Simple sound texture — but sounds very clean
- Feels randomized at times
- Dropouts!

### Every single thing

- Filter action
- Simple drum motif
- Interesting chorus
- Not quite sure how to describe the high chorus, but it's slightly off-putting

### Black Qualls

- Funky filters + funky vocals
- Synth cutoff
- Various EQ effects on the vocals
- Radio effects
