1 | Overview of Human Diseases

A lecture by the Legendary Dr. Paul Hauser. Slides are here
#flo #disorganized

- Viral proteins are usually easy to assemble

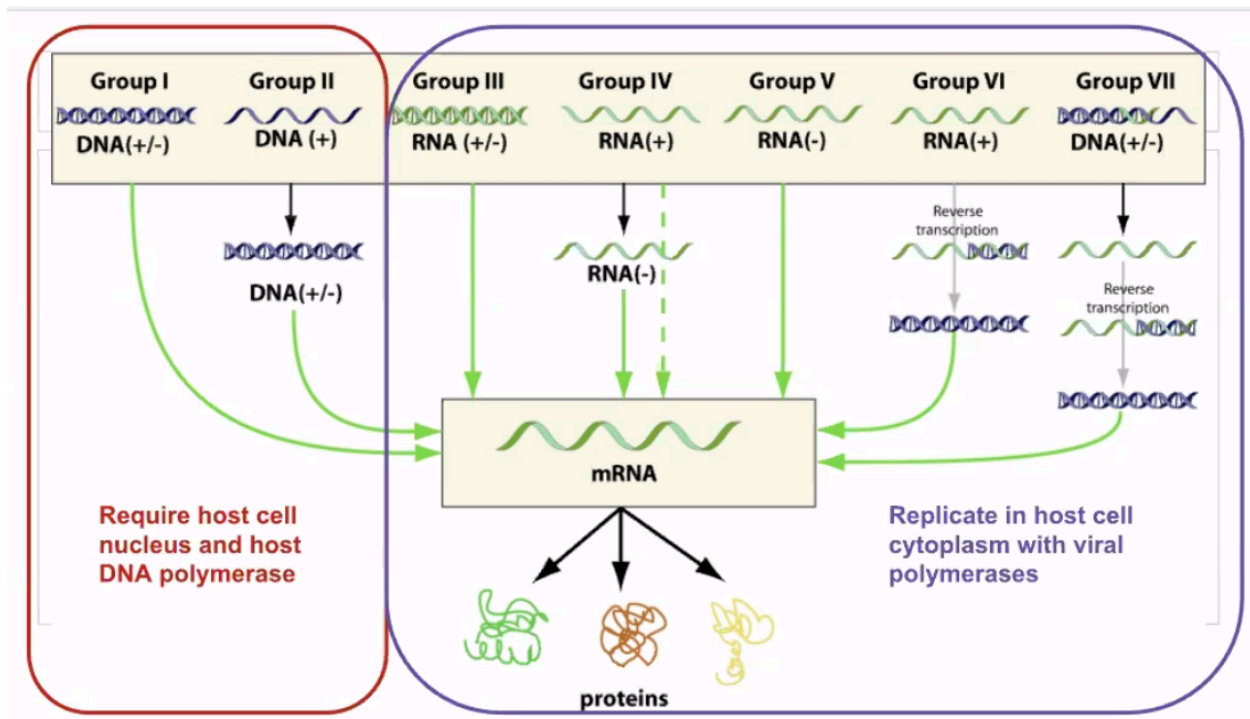

Figure 1: Screen Shot 2020-11-02 at 2.48.22 PM.png

Question: how are proteins made in the viral genome

- No viruses produce ribosomes
- Ribosomes become centrally important for the virus
- What serves as the template to make new virus copies
