Electric — Alina Baraz

- · Interesting EQ choice on vocals
- · Syncth panning automation?
- · Vocal filtering action
- · Drum machine being filtered too
- · A LOT of filtering on vocals during chorus + backing vocals being synthesized instead of sung?
- · Male chorus seems to be eqed for bases w/ a pretty low HP
- · Filter and gain automation on synth create "wobbly" effect
- Ending rain SFX + a mids-only sonud effect
- · More wobbly filtering synth

Film — Aphox Twin

- · Already, lot's of drum machine action
- Simple sound texture but sounds very clean
- · Feels randomized at times
- Dropouts!

Every single thing

- · Filter action
- · Simple drum motif
- · Interesting chorus
- · Not quite sure how to describe the high chorus, but it's slightly off-putting

Black Qualls

- · Funky filters + funky vocals
- Syncth cutoff
- · Various EQ effects on the vocals
- · Radio effects
