# 1 | iStudio Check-Ins, Juilet and Serena

- Last meeting was more in depth
- Not too much to walk about
- What's everyone up to?

    - Joint communal effort
    - Ellie dived into branding w/ identity + software
    - Juliet started on hardware
    - **Umrusa, 9**

- Need to focus on software

    - Read up + researched
    - Need to impliment: gyro to record, relay, and computer to identify tics
    - Subproblems

        - Recording => built in?
        - Relaying => BTLE
        - Labeling => tagging and organizing data
        - Reporting => UI/UX experience to end user

- No money problems until minimization + packaging
